RE: Mechanical Integrity Test - Injection  
Well No. 15 (UIC Permit UTU300001)/  
Class III Permit Renewal Application

Dear Mr. York:

Thank you for your June 8, 1992 submittal of the results of the April 24, 1992 mechanical integrity test on Well No. 15. After review of the radioactive tracer well log and the logger's report it is our opinion that Well No. 15 has no significant leak in the casing and no significant fluid movement into an USDW through vertical channels adjacent to the injection well bore. The referenced test is hereby approved as proof of mechanical integrity for Well No. 15.

Also, we acknowledge receipt of your June 8, 1992 submittal of a Class III permit renewal application for Moab Salt, Inc. At the earliest opportunity please forward the missing corporate signatures and bond agreement as discussed with Jerry Jackson of this office. Also, please note that the permit issuance fee for this process will be \$7200 and will be due at the time of permit issuance.

Mr. E. K. York, Manager
